# GENERAL INFORMATION

This Parts Book contains service parts for the following model.

Model	No. Passengers	Engine Type	Engine Location	Transmission	Overall Wheelbase (Inches)	Width (Inches)	Year Built	Chassis Numbers
PD 4501	43	4-71 Twin Diesel	Rear Long.	Mechanical	307-3/4	96	1954-5	001/

Book is arranged as follows:

Description	Page	Description	Page
Major Group Index	1	Replacement Page Service	5
General Information	2	Telegraphic Code	6
Model Information	2	Text	7
To Locate Parts Information	3	Numerical Index	379
Decimal Equivalents & Abbrev.	4	Alphabetical Index	397

Major grouping is the same in all Parts Books, Group Index on page 1 shows sequence of these groups. First page of each group has a black tab for quick reference.

Each major group is divided into subgroups of related parts. Parts in a subgroup are arranged alphabetically with a detail group number for each description. Main part in subgroup also kits or sets appear first and are not arranged alphabetically.

After the detail group number is determined by reference to the illustrations or indexes, the part can be located quickly. The group number is a positive reference - it pinpoints the location of the part.

**SPECIAL EQUIPMENT:** The following SL's are incorporated in this book:

- SL-12133 Safety Door; SL-12167 Outside Rear View Mirror;
- SL-12183 Special Wheels

**SERIAL NUMBERS:** It is important to always specify serial numbers of vehicles when ordering parts. This serial number information is shown on the plate illustrated. The plate is mounted on R.H. side of dash.

# **TO LOCATE PARTS INFORMATION**

## **If Noun Name Is Known**

Refer to Alphabetical Index in back of book. This index lists all parts in alphabetical sequence by the noun name followed by location or application description.

After the correct noun name is located, turn to the group. For example, Shaft—rear axle, "group 2.0170". With model and identification information select the part number required.

If the subgroup is known it is not necessary to refer to the Alphabetical Index, it is merely a matter of finding the part alphabetically in the subgroup.

## **If Noun Name Is Not Known**

- (a) Refer to Major Group Index on the first page of book, keeping in mind the assembly for which the part is required, and determine the major group number. For example, if an Axle Shaft is required, the major group number is 2, covering Rear Axle—if a Main Drive Gear is required, the major group is 17, covering Transmission.
- (b) Refer to illustration of the assembly for your particular model. Locate the group in illustration for part required.
- (c) Turn to the group indicated and locate the part required.

## **If Part Number Is Known**

Refer to numerical index which indicates the group in which part appears.

## **Instructions for Ordering Parts**

1. Always show correct part number and name of part.
2. Always show street address and full instructions for shipment.
3. Do not designate quantity by "sets". State specifically how many parts are wanted.
4. Specify, when necessary, whether parts are right or left handed; painted or unpainted; front or rear. Left and right are determined by facing the same direction as driver. Any part which is designated "Front" is always nearest the front of the vehicle.

## **REPLACEMENT PAGE SERVICE**

### **To Keep It Up to Date**

The GM Coach parts book replacement page service is designed to help obtain maximum usefulness from your parts book. These replacement pages are released as necessary to keep your Part Book accurate and up to date.

The service is easy to use. Merely remove and destroy the old pages and insert the new ones. A check list is provided to indicate the latest pages.

### **If Your Parts Book Is Not Up to Date**

You will not have all of the new items listed for service.

You may be ordering an old type part on which a new type part is released and will be receiving incorrect material resulting in reordering, returning and delay.

You may delay repair of a vehicle by waiting for parts which you may have in stock under a different part number.

# TELEGRAPHIC CODE

Revised telegraph regulations make it possible to specify actual part number digits at code word cost when ordering parts by telegram. Therefore, it is not necessary to use Telegraphic Code when sending part numbers in telegrams.

The Code Words for Phrases and Sentences should be used for sending or decoding telegrams.
